

The Trinity Centre for Natural Products Research, **NatPro**, enables discovery and sustainable development of Natural Products with applications across sectors.

NatPro

The **NatPro** Centre provides a research platform for interdisciplinary global collaborations, linking academia and industry, to progress products from discovery towards the market.

- Our research areas include Terrestrial and Marine Natural Product: Chemistry, Molecular Biology, Plant Biotechnology, Polysaccharide and Protein Chemistry.
- We focus on Discovery, Analysis, Formulation, Regulations and Commercialisation.
- We offer SME and large industry collaborations across sectors.

If you are interested in those programmes, please contact **NatPro**.
Contacts: Prof. Helen Sheridan and Dr Gaia Scalabrino.

Marie Skłodowska-Curie Career-Fit Plus Fellowship

Enterprise Ireland Call for Proposals: Prior to creating the application, the experienced Researchers must discuss their potential fellowship application with the proposed **NatPro** academic PI mentor. Please see guidelines.

Enterprise Ireland is pleased to announce the second and final Call for Proposals for the CAREER DEVELOPMENT FELLOWSHIPS IN THE NATIONAL TECHNOLOGY CENTRE AND TECHNOLOGY GATEWAY PROGRAMME

- Researchers of **any nationality** can apply!
- Researchers of **any discipline** can apply!
- Researchers from the Widening countries* are encouraged to apply!
- Researchers at risk* are welcomed to apply!

(*for definitions <https://www.net4mobilityplus.eu/widening-countries/> and <https://www.maynoothuniversity.ie/sar-europe/insoireurope>)

| | |
|-----------------------|----------------------------------|
| Call opening | September 7 th , 2020 |
| Applications deadline | December 31 st , 2020 |

Are you an Experienced Researcher (i.e. in possession of a doctoral degree or with at least four years of full-time equivalent research experience)?

Are you residing outside the Republic of Ireland or in the Republic of Ireland for no more than 12 months in the three years before the deadline?

Do you want to enhance your skills, working conditions and career perspectives?

Do you want to explore working closely with the industrial sector in a market-focused research collaborative project?

Do you want to live and work in Ireland, one of Europe's Strong Innovators and the EU leader in innovation from SMEs?

Then you should apply!

<https://www.horizon2020.ie/career-fit-plus/#>

This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 847402

For the Career Fit Plus, you need to fulfil their criteria, have an outstanding CV and be passionate to work with an international team and **NatPro's** PIs, who will assist linking with industry and EI Centre placement.

Circular Economy International Workshop

SAVE THE DATE: October 8th and 9th 2020

From biowaste to value – Systemic change in the food industry

Put circular economy concepts & tools into practice and extend your network

SHORT COURSE EVENT IN FRANKFURT, GERMANY

Bring biowaste to new use!

Work on real life challenges using circular innovation tools & concepts

This is what you can do in our two-day workshop session, offered by the Center for Industry and Sustainability (ZIN, department of Proবাদis Hochschule) in cooperation with EIT Climate-KIC, supported by the EU. By participating, you get the chance to apply circular innovation tools as a valuable asset to your research. You further will be able to connect with young professionals, PhDs and postgraduate students from different backgrounds and get in touch with companies implementing circular economy solutions.

DAY 1: Introduction to relevant research and circular innovation concepts, apply tools in practical group challenges and connect with peers

DAY 2: Continue the group work, learn about sustainable business models and share your results with the participants & challenge owners

WHO? PhDs, master's degree students and young professionals in the field of business and science interested in the topic of circular economy, sustainability and innovation management

WHEN? October 8th & 9th 2020

Interested? Get in touch with Carolin & Isabell and we will notify you once registration opens:
